Clinic Appointments

For private patients and international patient center

Mrs. Anja Schlageter, Mrs. Heidi Erdel

Phone +49 89/4140-2521/-2522

Fax +49 89/4140-4843

How to reach the Klinikum rechts der Isar

We recommend taking a cab or public transportation (MVG). Coming from Munich central station please take the underground line U 4/5 to station Max-Weberplatz (main direction Arabellapark/Neuperlach).

If you prefer taking the car, you will find a limited number of parking lots in front of the main entrance (exempt from charges but almost always occupied) and another chargeable parking lot on the clinic area at the gateway Trogerstraße coming from the direction Einsteinstraße or Ismaninger Straße.

Department of Urology
Klinikum rechts der Isar
der Technischen Universität München

Professor and Chairman: Jürgen E. Gschwend M.D.

Patient Management

Our physicians and staff provide compassionate, state-of-the-art medical and surgical patient care in all areas of adult and pediatric urology.

Urologic Oncology

Renal Tumors: radical, laparoscopic, robotic and open organ-preserving surgery.

Bladder Cancer: transurethral resection of bladder tumors including fluorescence cystoscopy. Radical cystectomy (nerve-sparing surgery in female and male patients) with continent (i.e. orthotopic ileal neobladder, continent pouches) and incontinent (i.e. conduit) urinary diversions.

Prostate Cancer: radical prostatectomy (potency-preserving, robotic laparoscopy da Vinci®), LDR-brachytherapy (seedimplantation).

Testicular cancer: radical orchiectomy, testis sparing surgery in selected cases and retroperitoneal lymph node dissection.

Chemotherapy: all standard chemotherapy and immunotherapy protocols for urologic malignancies and additional new drugs within clinical trials.

Reconstructive Urology

Ureteral reconstruction, urinary diversion, urethroplasty (i.e. mucosal graft substitution), hypospadias repair, artificial urinary sphincter, penile prosthesis, laparoscopic reconstructive surgery for ureteropelvic junction obstruction, reconstructive pelvic surgery (robotic laparoscopy da Vinci®).

Urogynecology

Surgical treatment of urinary incontinence (i.e. fascial slingplasty,TVT, TOT, Burch colposuspension).

Kidney Stone Disease/Benign Prostate Enlargement (BPE)

Extracorporeal shock wave lithotripsy (ESWL), semi-rigid and flexible ureteroscopy (URS/ RIRS), percutaneous nephrolithotomy (PNL and Mini-PNL = „keyhole surgery for kidney stones“), intracorporeal laser-lithotripsy, open surgery for stone removal, transurethral resection of the prostate, laser-based treatment of BPH.

Pediatric Urology

General pediatric urology, reconstructive surgery of congenital anomalies of the genitourinary tract (hypospadias, cryptorchidism, obstructive uropathies [hydronephrosis], vesicoureteral reflux); management of urinary tract stone disease, endoscopy, laparoscopy.

Andrology and Male Sexual Health

Erectile dysfunction, male sexual dysfunction, penile prosthesis implantation, infertility, vasectomies, correction of penile deformity, therapy of congenital anomalies (i.e. hypospadias, cryptorchidism).

We offer a wide range of patient services to meet your urologic health care needs.

Outpatient clinic for general urology
